

FastTrac Construction Products

With more than 30 years experience in developing and manufacturing cutting edge products, FasTrac Construction Products is known for performance and consistency.

FasTrac Skid Steer Mixers turn any skid steer loader into a portable concrete mixer, ideal for applications where space, speed, cost and convenience are factors. It's quick and easy to clean, and provides more capacity and convenience than drum mixers, making them perfect for multiple applications.

- FasTrac 125 Mixer
- FasTrac 500 Mixer
- FasTrac 750 Mixer

Streamline your operation and mix right at the pour site with FasTrac Skid Steer Concrete Mixers!

Mix Right at the Pour Site

Ideal for Fast-Setting Epoxy and Concrete

Convenient Fold-Up Bag Breakers

Zero-Leak Slide Gate with 6ft Chute

Easy Operation and Cleanup

Reversible Auger for Superior Mixing & Dispensing

Low Mixer Height for Ergonomic Use

Light Weight and High Capacity

Less Expensive than Full-Sized Mixers

For Superior Results Go With FasTrac Construction Products

FasTrac Mixer

Closer tolerance reduces separation of large aggregate for a superior mix.

Single-piece, all welded auger for reduced maintenance.

Rigid steel paddles scoop and mix more thoroughly.

Other Mixers

Wider tolerance allows more separation of large aggregate for an inferior mix.

Rubber paddles - more parts and more headaches.

Flexible rubber paddles curve and push material down.

FasTrac Skid Steer Concrete Mixers

“

We use the FasTrac Mixer for highway patching projects, and I like how it's mobile, yet large enough to provide added efficiencies; and compared to typical mortar mixers, it provides superior mixing and is faster and easier to clean up.

Terry Kraemer
President, Diamond Surface, Inc.

“

With a barrel mixer, we can get about 30 to 40 holes a day, and that's working pretty hard at it. With the FasTrac Mixer we can do 100 holes a day, and it's painless. It takes us just about 20 minutes to mix and dispense a load.

Scott McLaughlin
Owner, McLaughlin Fence

Optional hydraulic operated gate available.

Single-piece steel auger features rigid steel paddles jig welded to the axle. Auger is reversible for superior mixing and dispensing.

New Slide Gate features a tight seal with no leakage.

Optional water tank for mixing at the pour site and remote locations.

Rubber trough is easy to access from the bottom.

Gate control permit precise control of pours.

Baffled corners help prevent dry material from building up, for a superior mix quality.
